SOFTERWATER
SOLVING WATER PROBLEMS AROUND THE WORLD

softerwater.com.au

LEFT UNTREATED MINERALS IN WATER WILL CAUSE PROBLEMS IN YOUR SHOWER

- ⚠ Scale build up on pipes, showerheads, shower screens, taps and tiles
- ⚠ Corrosion of taps and fittings
- ⚠ Hard to clean spotting on shower screens, taps and tiles
- ⚠ Excess use of bodywash, shampoos and conditioners
- ⚠ Poor suds
- ⚠ High mineral levels increase skin irritations
- ⚠ Dry, frizzy hair

ARE YOU AT RISK?

Signs to look out for:

- ⚠ White spots where water has dried such as Shower screens, taps & faucets, cars, boats
- ⚠ Poor lather / low foam production from soaps and detergents
- ⚠ Dry hair and skin irritations
- ⚠ Decreased performance and increased running costs of appliances and equipment
- ⚠ Decreased performance and increased maintenance costs of evaporative air conditioners, hot water systems and appliances
- ⚠ Increased chemical usage in swimming pools and cooling towers
- ⚠ White 'chalky' appearance on surfaces
- ⚠ Premature failure of pumps, heating elements and related equipment
- ⚠ Calcification inside pipes, faucets, hot water systems, heating elements and chlorinator cells

THE SOLUTION!

A Showersoft Conditioner

Specifications:

Thread: 1/2" 15mm BSPP Male/Female

Length: 102mm

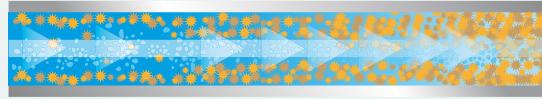

Housing: 316SS Premium Stainless Steel

Flow Range: 7 to 15l/min

- ✓ Protection against unsightly scale build up on shower heads, taps, shower screens and tiles
- ✓ Reduced spotting on shower screens, tiles and tapware
- ✓ Any remaining spotting is easily wiped away
- ✓ More effective mix of water with bodywash, shampoo and conditioner
- ✓ Improved suds
- ✓ Softer, less dry and healthier hair
- ✓ Reduced skin irritations
- ✓ No decrease in water pressure
- ✓ Simple two minute installation

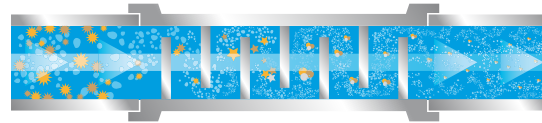

A SIMPLIFIED LOOK AT OUR ADVANCED TECHNOLOGY

STANDARD WATER SYSTEM

Scale-causing minerals have a high electrical charge, repel each other and 'stick' to pipes and equipment causing costly hard water problems.

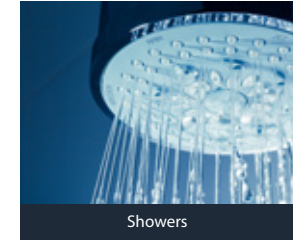

WITH SOFTERWATER CONDITIONER

The softerwater alloy produces a turbulent mineral-attracting galvanic action reducing the electrical charge of minerals.

Non-sticking nano sized colloids are formed and flow through the system in suspension significantly reducing hard water problems.

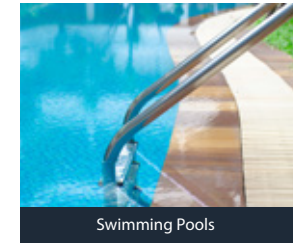

APPLICATIONS

Showers

Washing Machines & Dishwashers

Swimming Pools

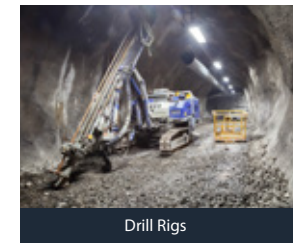

Residential, Caravan & RV

Cooling Towers

Irrigation

Drill Rigs

Commercial
